Intro

Create a drop down menu when you are bound to the tab frame work within APEX.

Main features

- Uses the list templates making all type of menu's possible.
- If the parent tab has only one standerd tab you can choose not the generate the standard tab but set it's link to the parent tab.
- Depending on your menu you can set the parent tabs to have link or not.

Installation

With this installation package there is a plug-in installation file named:

- **region_type_plugin_net_vanbaren_apex_tab_menu_list_v1.01.sql**

Navigate to **Shared Components** > **Plug-ins** and click <**Import**>. From there you can follow the menu to upload and install the plug-in using the file above. After the plug-in has been installed successfully you will be redirected to the plug-in edit screen.

Configuration

Addition steps to get the plugin working

Region settings

Template:	Name of list template. Template is used to render the html of the region. The template needs to belong to the current theme. And the name is case sensitive.
Include single tab	Should the tab be include if it is the only one? If the parent tab has only a single tab: <ul style="list-style-type: none">• No The parent tab gets the url of the tab. And the tab is not rendered.• Yes The parent tab and the tab are both rendered.
Parent link	Should the parent have a link? <ul style="list-style-type: none">• No The link attribute is replaced by "#"• Yes The link of the parent tab. If include single tab is no the parent tab will have the link of the tab when there is only one tab. Even when Parent link is set to No.
